Task ID	Story Points	Dependencies
#53	3	N/A
#27	8	#26
#29	8	#28
#28	8	#49
#26	8	#49
#18	21	N/A
#25	21	#49
#50	8	N/A
#49	8	#50
#52	8	N/A
#47	8	#48
#48	8	N/A
#51	3	N/A

Critical Path

The critical path here is #50 -> #49 -> #26/#28. This sprint we focused on allowing users to make posts, which can be liked and commented on. Therefore, we must make the actual post before adding the functionality to like or comment on them. So #50, #49 are post tickets, focused on making the actual post, then #26, #28 are comment/like tickets, we must finish making the posts before making the likes and comments.

Keeping the Spring in Schedule

We were able to keep the sprint in schedule since we prioritized those tickets, therefore we focused on making the ability to create posts early on in the sprint, so others could start the implementation of their own tickets, which include likes and comments.
